

Year 2: Magical Mapping

Key Vocabulary

aerial view	A photograph or satellite image looking down from above.
continent	One of the earth's large land masses.
compass	Magnetic instrument used for finding direction, having a magnetic needle which points to the magnetic north.
human feature	A feature of a place that has been made by humans.
key	Simple pictures / symbols used to represent geographical features on a map.
ocean	A very large stretch of water that includes lots of seas.
physical feature	A natural feature of a place such as mountains, rivers, hills or lakes.
scale	How much detail a map shows by 'zooming' in or out.
sketch map	A map drawn from observation rather than measured accurately.

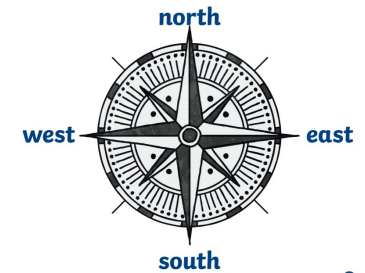

What is a map?

A map is a picture of a place, usually drawn from above.

They can be drawn at different scales to show different features.

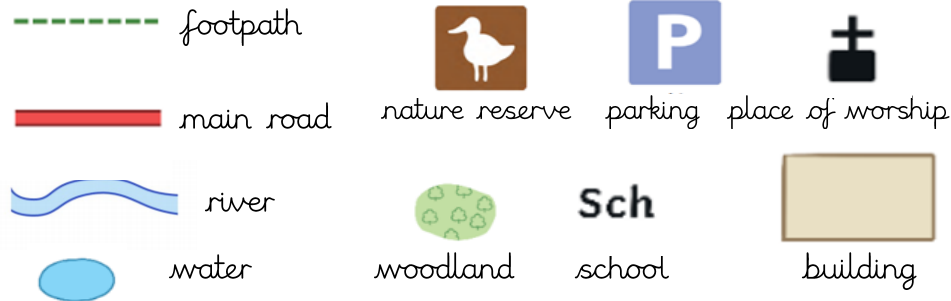

How can we navigate a map?

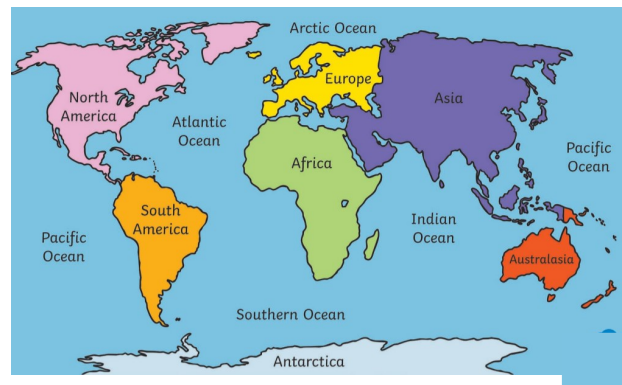

Why do we use map symbols?

We use map symbols to represent different human and physical features when showing them on a map.

What are the seven continents and five oceans?

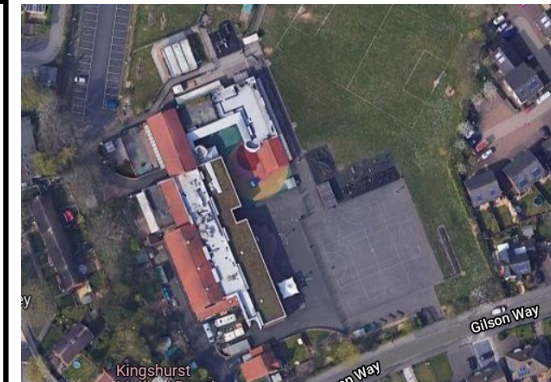

The Five Oceans

- Pacific Ocean
- Atlantic Ocean
- Indian Ocean
- Southern Ocean
- Arctic Ocean

The Seven Continents

- North America
- South America
- Europe
- Australasia
- Antarctica
- Africa
- Asia

What can an aerial photo

Aerial photographs help us to see human and physical features from above.
