

Year 3 Maths Assessment Targets Colouring

Number - Number Place and Value	I can count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number.	I can recognise and show, using diagrams, equivalent fractions with small denominators.	Number - Fractions
	I can recognise the place value of each digit in a three-digit number (hundreds, tens, ones).	I can add and subtract fractions with the same denominator within one whole [for example, $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$].	
	I can compare and order numbers up to 1000.	I can compare and order unit fractions, and fractions with the same denominators.	
	I can identify, represent and estimate numbers using different representations.	I can solve problems that involve all of the above.	
	I can read and write numbers up to 1000 in numerals and in words.	I can measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).	
	I can solve number problems and practical problems involving these ideas.	I can measure the perimeter of simple 2-D shapes.	
Number - Addition and Subtraction	I can add and subtract numbers mentally, including: - a three-digit number and ones, - a three-digit number and tens, - a three-digit number and hundreds.	I can add and subtract amounts of money to give change, using both £ and p in practical contexts.	Measurement
	I can add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction.	I can tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks.	
	I can estimate the answer to a calculation and use inverse operations to check answers.	I can estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight.	
	I can solve problems, including missing number facts, place value, and more complex addition and subtraction.	I can know the number of seconds in a minute and the number of days in each month, year and leap year.	
		I can compare durations of events [for example to calculate the time taken by particular events or tasks].	
Number - Multiplication and Division	I can recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	I can draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them.	Geometry - Properties of Shapes
	I can write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.	I can recognise angles as a property of shape or a description of a turn.	
	I can solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.	I can identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle.	
Number - Fractions	I can count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10.	I can identify horizontal and vertical lines and pairs of perpendicular and parallel lines.	Statistics
	I can recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.	I can interpret and present data using bar charts, pictograms and tables.	
	I can recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators.	I can solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.
